

Docucart #D368 Transit Cart

The Transit Cart was designed specifically for moving 368 linear filing inches or 15 conventional file drawers of records (files, binders and books). A professional heavy duty large volume records cart designed to easily carry 810 lbs of records. What makes this unit different? Let's start from the ground up and look at the engineering in this cart.

Supported by 4 Phenolic 6"H x 2"W, non-marking double ball bearing swivel casters with a grease cerk, 5/8" swivel kingpin, a 1/2" axle, and a 1/4" steel mounting plate capable of supporting 4,800 lbs. Above the wheels the base structure is a welded 4"W x 2"H 11 gauge tubular steel framework base with 2"x2" steel angle stock for reinforcement. Designed above the steel base, the end panels, base and top are constructed of 3/4" plywood with an HPL laminate for durability. The intermediate shelves and center panel are manufactured with 3/4" industrial particleboard with an LPL cover. Vertical and horizontal components are secured by high quality Hafele connecting brackets. Shelves are tilted back 5 degrees to provide security for transporting materials. To facilitate moving and control of the unit a large stainless steel handle (24" x 1.5", rated for 900lbs of pressure) is mounted on each end of the unit for operation by 2 people.

The perfect solution for applications where many records need to be moved.

The Docucart #D368 comes fully assembled and ready for use.

Dimensions: 64"H x 29.75"D x 48.25"W

Weight: 390 lbs.

Caster: 6"H x 2"W

Shelf sizes: top 12"D x 46"W

bottom 3 shelves "2 compartments" 12"D x 22.75"W

Clear Shelf Opening for Media Storage:

*top shelf 13.25"D x 12.25"H

*third shelf from bottom 13"D x 12.25"H

*second shelf from bottom 12.75"D x 12.25"H

*bottom shelf 12.5"D x 12.25"H

*Maximum clear opening (back of shelf to front of unit).

The end panels, top and base shelves are HPL laminate and edge banding in "Folkstone Gray". The shelves and interior is a white LPL laminate.

Docucart is produced with materials that contribute to LEED, MR 4.1 or MR 4.2.
